

# [ Brute Force 650 4x4 ]

## Nothing beats Brute Force.

With a comprehensive range of features and full-sized performance for the price of a middleweight ATV, the Brute Force 650 4x4 offers the most 'bang for your buck' in its class – bar none. Its compact size, gutsy 650cc V-Twin engine, rugged yet light handling chassis and Sports Utility Vehicle styling comes together in a user-friendly package that's got the performance edge at work or at play.

### Variable torque front differential

A handlebar mounted lever enables manual front differential control for maximum grip in sticky situations.

### Fully-enclosed wet rear braking system

Kawasaki's unique, low-maintenance fully enclosed, wet, multiplate rear braking system keeps the mud out and the stopping power in.

### Heavy duty towing and carrying capacity

The 650 4x4 offers a massive 120kg combined carrying capacity and, thanks to its sturdy chassis and lowdown grunt, boasts equally impressive towing capabilities.
